Scope of Policy

This policy is defined to apply to corporate clients

1. Definition of Terms

1.1 Critical Cases

Cases are tagged as Critical if they meet any of these criterion;

- If a client threatens to churn due to technical reasons
- If a client is requesting to be disconnected
- If a client has more than 3 service affecting incidents & above in a 30-day period except for general downtimes
- If a client complains of poor service for a period over 7 days.
- VIP clients with service impacting incidents
- Requested to be tagged critical by Supervisors/Managers, HOD's & the GM

2. Responsible Teams

2.1 Tickets are tagged as critical by:

- CSD & Account Management
- Supervisors/Managers or HOD's

3. Tagging Tickets as Critical

3.1 Cases are tagged as Critical;

- At the start of the case (when a ticket is opened)
- During the progression of a ticket

3.2 Once a case is tagged as critical;

- Any individual handling the case, in any department it passes through is required to escalate to team the Manager for input.
- For CSD, based on the shift system operated, the case is escalated to Case Control/Supervisor in place of a manager
- In cases where the team Manager (Supervisor/Case control in the case of CSD) is unreachable (on leave, cannot be reached on phone), the case is escalated to the HOD.
- Any input given from the escalation should be highlighted in clear terms on the ticket

3.3 Cases tagged as critical cannot be untagged
